CAREER OBJECTIVE

Aspiring Software Engineer with a strong foundation in full-stack development, real-time systems, and mobile application development. Seeking an opportunity to apply my technical skills, problem-solving abilities, and project experience to build impactful software solutions. Eager to contribute to a growth-oriented organization while continuously learning and advancing as a technology professional.

EDUCATION

Bachelor of Technology — Information Technology **2024 – 2028 (Expected)**

R.M.K. Engineering College, Chennai | CGPA: 8.44 / 10

PROJECTS

1. [FetchMate](#) | React Native, Expo, TypeScript, Supabase, Zustand **20/05/26 – 20/06/26**

- Developed a cross-platform peer-to-peer delivery app connecting college hostellers with day scholars, featuring secure authentication, realtime feeds, and interactive status tracking.
- Engineered a robust backend using Supabase PostgreSQL, implementing complex Row-Level Security (RLS) policies, server-side RPC functions for wallet escrows, and secure image storage.
- Integrated Expo Push Notifications with Firebase Cloud Messaging (FCM) to deliver instant updates for live chat messages, order status changes, and automatic timeout cancellations.

2. [Telegram Group Music Bot](#) | Python, FastAPI, WebSockets, SQLite, Vanilla JS **01/06/26-07/06/26**

- Reduced idle memory by 62% (154MB → 58MB) by profiling dependencies and replacing the heavyweight aiogram framework with direct, asynchronous HTTP calls via httpx.
- Implemented DES-ECB decryption of encrypted media URLs.
- Engineered a "Zero-Bandwidth" architecture by resolving media URLs directly from CDNs, offloading all audio streaming traffic away from the server to support concurrent users on a 256MB RAM instance.
- Implemented an authoritative server-side playback clock using WebSockets, ensuring sub-second audio synchronization across multiple clients with drift correction logic.

TECHNICAL SKILLS

Languages & Frameworks: Java, React, Python, JavaScript, TypeScript, Dart, SQL, HTML, CSS, React Native, FastAPI, Node.js, PostgreSQL

Tools & Platforms: Git, GitHub, VS Code, Docker, REST APIs, WebSockets, SQLite, AWS, Claude Code

Concepts: Real-time systems, WebSocket protocols, memory profiling, DES decryption, async I/O

LANGUAGES

English (Professional) • Tamil (Native)
